Explore an original Shepherd’s “Mitato” and meet Cretan wild fauna

Our amazing off-road adventure starts after climbing up the White Mountains and passing through Meskla village which is situated under plane trees, beside the river Keritis. On the way up to the shepherd’s “Mitato” you will enjoy the magnificent panoramic view of northern Crete and, if we are

lucky... eagles and wild goats will stop for us to take some photos. Arriving at Therisso and working up an appetite we visit a small traditional tavern where we will be welcomed by the owner, to introduce us to Cretan cuisine with plenty of food, wine and warm Cretan hospitality. A small rocky road will lead us up to our trip’s highest point 1150 meters in altitude, where you will find out all about the lifestyle of a shepherd and explore his original "Mitato". There will be free time for

taking photos and exploring the area. On our way back we will pass through the amazing gorge of Therisso that will lead us to the city of Chania.
